

27 February 1979

MEMORANDUM FOR: Associate Director - Management, NFAC

THROUGH : Director of Strategic Research  
Chief, NFAC Administrative Staff  
NFAC Academic Coordinator

SUBJECT : Invitation to Appear at Hiram College

1. I have been invited to visit Hiram College, Hiram, Ohio, for two days. The invitation has been extended by the Dean of the College, a former colleague of mine at the Graduate School of Arts and Sciences at Harvard University. There are two purposes to the visit: first, to deliver an extemporaneous, unclassified talk to a student-faculty group on my job and on working for the CIA in general; and second, to talk informally with students about career opportunities in the CIA. I would be expected to answer questions from faculty and students.

STAT

2. The visit is planned for sometime at the end of March or during April, contingent upon my schedule. Dr. Richard Ekman, Dean of the College, specifically contacted me. His office telephone number is (216) 569-3211, extension 259.

STAT

3. I think that the Agency could profit by my visit to Hiram College. Students and faculty would be interested in having an "inside" view of how I, as a person trained in liberal arts, go about working on questions that are very much a part of current events. Furthermore, Dean Ekman has told me that virtually all of the students at the college are preoccupied with questions about the uses of liberal arts majors in careers. I believe that I could convey an informative and favorable message about the CIA and about the quality of government jobs in general. I would expect to be briefed by the Recruitment Division in the Office of Personnel prior to the trip. I realize that if I am permitted to go, I would be subject to certain

constraints posed by security considerations. Nevertheless, I think the visit could be useful for both the Agency and those Hiram College students considering the CIA for a career.
